

## **LimoGlobe - GDPR**

### **Introduction**

LimoGlobe respects the privacy of its clients and manages all data/information, regardless of its nature or medium, in a safe and professional manner. This document outlines the key features of LimoGlobe's data/information management in respect to the GDPR set by the EU.

### **Business relationships and the nature of offered services**

As LimoGlobe is a supplier to larger organizations and entities, it does not collect, register or store any data/information that is relevant to the GDPR set by the EU. All LimoGlobe's business relationships are B2B-based (business to business) and all data/information related to these relationships are managed through and based on contractual agreements between LimoGlobe and its clients.

LimoGlobe does not provide the possibility for any entity, whether an individual or an organization, in the context of the GDPR to register onto any technical portal or application, therefore the identification of any individual is not possible.

The entire life cycle of any specific service or service entity is managed only with reference numbers or project codes with no references to any natural persons.

### **Data security**

LimoGlobe uses only secure connections for the transferring of data/information. Website traffic is conducted under SSL-protocol and the website does not collect any information from visitors browsing the website.

Email correspondence is conducted through secure servers and all relevant traffic is filtered through a constantly updated virus detection program.

Information/data of any nature is not transferred outside the EU.
